## NEW! Smart Blade Assembly Doctor blade holder for Performance Series

---

### Eliminate Ink Spitting at High Production Speeds

The Smart Blade Assembly, designed by Mark Andy with Business Responsive Technology, has been developed to achieve higher print quality at faster speeds with UV inks. The design allows for doctor blade angle and pressure to be adjustable, virtually eliminating ink spitting at full production speeds and increasing blade life, achieving improved productivity and uptime.

The Smart Blade Assembly is available as an option on all new Performance Series presses, or as an upgrade to most existing P Series installations.

### Features

- Proven 40° angle of doctor blade on Performance Series presses
- Spring-loaded design offers pressure adjustment for optimum performance
- Lighter weight than existing air-loaded design

### Benefits

- Eliminate spitting on 96% of inks
- Achieve faster production speeds with UV inks
- Extended blade life
