

# EVOLUTION SERIES

Modern Label Production Made Attainable

**ML** MARK ANDY

## The Most Value-Driven Press in its Class

### Full Servo Flexo

Evolution Series E3 is a simple-to-operate platform powered by proven Mark Andy Performance Series engineering and technology, providing converters the technology they need to thrive in the competitive label market.

### The Performance You Need, Evolved

#### Profitability

Demonstrated registration performance, tangible waste savings and less material ensures a substantial impact to your bottom line.

#### Productivity

Fast changeovers and easy setup for print and die stations carry through from the Performance Series to the E3, reducing downtime and increasing daily capacity limits.

#### Quality

With precise independent inking and impression, robust die cutting options and precision tension control, reliable high-quality label production comes standard with Evolution Series E3.

#### Support

With the largest global service team in the industry, you are supported by Mark Andy to succeed. Beyond technical assistance, we offer our partners business development consulting, application expertise, and all the parts and consumables needed from a true Total Solutions Partner.

### Mark Andy ProUV

Evolution Series E3 introduces Mark Andy ProUV technology. Powered by Phidastien's proven UV curing technology, ProUV enables high-quality, reliable results converters can count on - all backed by Mark Andy's global service network.

ProUV is a fully integrated curing system, with power and air located on-press within a single cabinet to help converters maintain a smaller pressroom footprint.

**With high (up to 94%) efficiency power supplies, ProUV users can expect energy savings through power factor up to 94%.** ProUV electronic power supplies are also LED compatible, a feature that provides production versatility to label manufacturers. Fully adaptive ventilation control allows for greater temperature variance as ProUV lamps are at the optimal temperature in every environment.

### Built Upon the Award Winning Performance Series Design

**Agile:** Superior Flexibility

**Simple:** Rapid and Repeatable Settings

**Lean & Green:**

Reduces Material and Ink Waste

**Precise:** Consistent Print Quality Management

**Smart Business:** Redefines Profitability

### Technical Specifications

Web Width	13/17 inch (330/430 mm)
Max Speed	500 fpm (150 mpm)
Substrate Range	.002 - .012 inch (50-305 micron)
Print Repeat Range	5.5 - 24 inch (140-610mm)
Die Repeat	Up to 24 inch max (610 mm max)
Unwind Capacity	40 inch (1016mm)
Rewind Capacity	40 inch (1016mm)

#### Rail System

Provides maximum flexibility and allows for the addition of further converting options

### E3 Features & Options to Maximize Print Potential

#### Web Cleaning / Corona Treatment

Enhance the performance of your press by removing web contaminants

#### Auto Registration Suite

Simple and swift for any operator, regardless of skill level

# High-Quality Prime Label Applications
