

Variable  
Data Integration  
Made Easy

**MA** MARK ANDY

**Printing barcodes and customer custom fields is now as easy as adding a modular device to your equipment.**

Digital Plus Variable (DPV) is a simple and cost-effective press upgrade that adds single-color variable data to virtually any new or existing digital, flexo, or finishing machine without slowing down production. With advanced Kyocera printhead technology and a robust design, DPV is a permanent solution for a broad range of industrial and commercial printing applications.

## Technical Specifications
